Energy Saver Downlight Pack

- Pre Wired Lampholder
- Wide Cable Entry
- Fire Safe Thermal Cut Off

Installation Instructions:

1. Install using a registered electrician. When choosing downlight position also ensure that MIC, SCB and HCB clearances are adhered to.
2. Cut hole through building insulation the same hole diameter as the downlight hole cut. Nominal hole size 70mm, check fitting before cutting hole.
3. ISOLATE POWER SUPPLY, connect TPS cable to transformer assembly.
4. Stretch ventilation coil to height of building insulation.
5. Clip the red thermal cut off protector to coil with only enough give for lamp replacement.
6. Place transformer on a piece of board on top of insulation ensuring ventilation of transformer.
7. Fit downlight into hole by holding back spring clips and inserting into hole.
8. Fit lamp into downlight.

Parts included in Downlight Pack:

- 1x Prewired electronic transformer with lamp holder and Fire Safe thermal cut off.
- 1x HIH high intensity energy saver halogen lamp 35W = 50W illuminance
- 1x Tiltable downlight flange
- 1x Heat ventilation coil
